

## UNIVERSITY COLLEGE TATI (TATIUC)

## FINAL EXAMINATION QUESTION BOOKLET

COURSE CODE : FGE 1023  
COURSE : COMMUNICATION SKILLS II  
SEMESTER/SESSION : 2, 2022/2023  
DURATION : 3 HOURS

MATRIC NUMBER : \_\_\_\_\_

PROGRAM : \_\_\_\_\_

DESK NUMBER : \_\_\_\_\_

LECTURER'S NAME : JULIANI HUSSAIN

Instructions:

1. This booklet contains 2 sections. **Answer All questions.**
2. All answers should be written in this **QUESTION BOOKLET.**
3. Write legibly and draw sketches wherever required.
4. If in doubt, raise up your hands and ask the invigilator.

**DO NOT OPEN THIS BOOKLET UNTIL YOU ARE TOLD TO DO SO**  
**THIS BOOKLET CONTAINS 13 PRINTED PAGES INCLUDING COVER PAGE**

3. How much do the foreign and local tourists spend on shopping compared to transport?

---

---

(2 marks)

4. Where do most foreign tourists like to stay?

---

---

(2 marks)

5. Which type of accommodation has the same ranking among both foreign and local tourists?

---

---

---

(2 marks)

## TEXT 2 : Part 1(ii)

Read the passage and answers the questions below. (10 marks)

Water is the most precious gift to humanity by God. It is the most essential need of humans, animals, insects, plants, birds and other living beings for their survival on this planet. Though 3/4<sup>th</sup> surface of earth is covered with water only 3% of that is available as fresh water (of which 70% is present as ice sheets and glaciers and only 1% is available as clean drinking water or which fits for human use).

Water is used for all the purposes such as washing, bathing, cooking, watering plants, irrigation, in industries for performing chemical reactions, generating electricity, manufacturing different materials and also in laboratories for performing various reactions.

Thus, because of increasing demand of water in an era of increasing population and finite availability of water, there is a huge requirement to conserve it. Awareness should be created among people to save water which eventually will lead to save life on earth.

1. Why water is the most precious gift to humanity by God?

---

---

(2 marks)

2. What is the function of water?

---

---

(2 marks)

3. How can water help the industry?

---

---

(2 marks)

4. Why awareness should be created among people to save water?

---

---

(2 marks)

5. Give two example of awareness campaign to save water?

---

---

(2 marks)

**PART 2**

## Part 2 (i)

Fill in the following blank with the correct information gathered from the following passage (20 marks)

Man is the cause of the destruction of the environment.

Technological advancements have brought unequivocal benefits to human lives, offering security and convenience. Nevertheless, the advancements and progress have to come with the destruction of the environment. Man has indeed caused air pollution, destroyed forests and threatened marine ecosystems in the name of development.

One cause of environmental damage is air pollution. The emission of harmful gases, namely carbon monoxide, carbon dioxide and the unfiltered emission from diesel-powered vehicles, compound the problem that contributes to the greenhouse effect. This had led to an unprecedented rise in global temperatures. Life on earth faces potential calamity such as climatic change, which brings about severe droughts. For instance, in 2011, Texas experienced the worst droughts in decade which affected livestock and crops. Hence, this show that the act of Man has destroyed our environment.

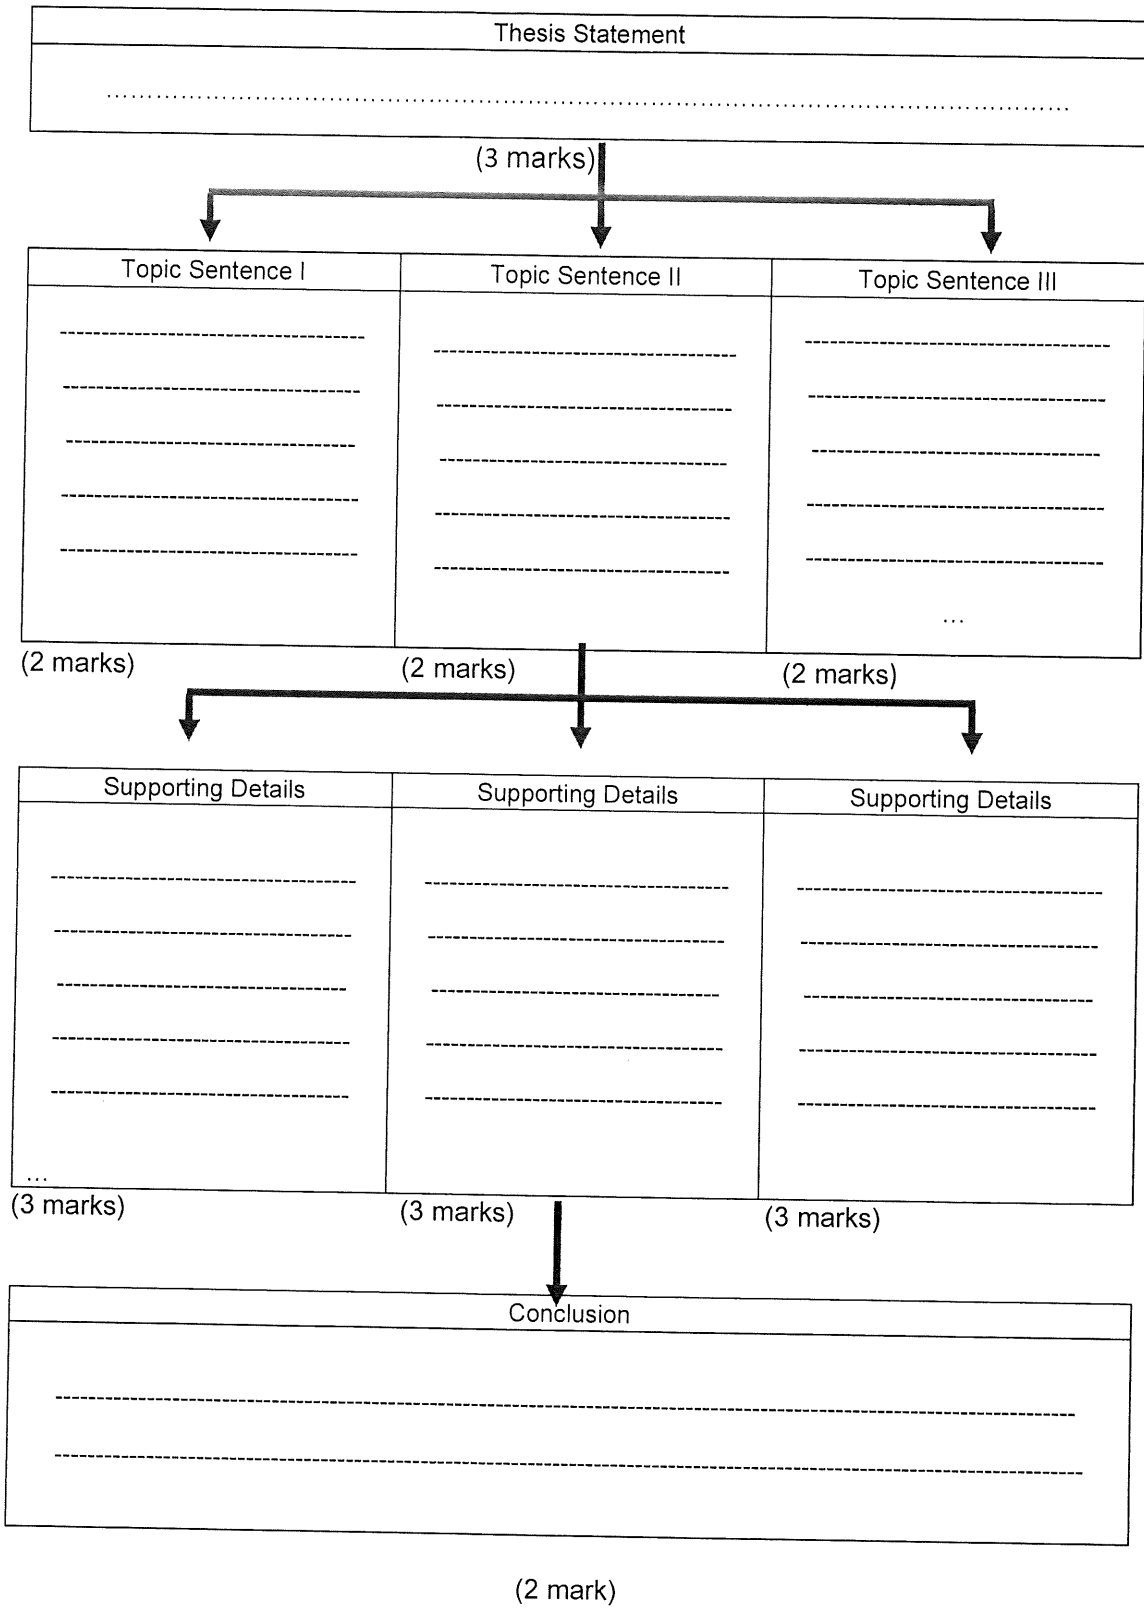

Besides that, environmental damage is caused by massive deforestation. Illegal loggers are drawn by lucrative profits, and poor enforcement of existing laws has accounted for unsustainable logging activities. Thus, deforestation has destroyed water catchment areas and contributed to increased occurrence of landslides and flash floods. China's Three Gorges Dam, which has threatened to submerge 13 cities, 140 town and 1,350 villages is one good example of the impact of deforestation. Isn't it clear that Man is the main culprit that damages our environment?

The impact of human activities on marine life is equally alarming. Millions of tonnes of unfiltered refuse and domestic waste are disposed of indiscriminately in rivers, polluting the water. The polluted water cannot sustain the aquatic life. For example, extensive damage to marine life from the Deepwater Horizon oil spill in the Gulf of Mexico has affected fishing and tourism in that area. Who else but Man who destroys our environment!

In conclusion, it is undeniable that Man has caused destruction of the environment. We can blame no one but ourselves due to our own attitudes.

FGE 1023 COMMUNICATION SKILLS II

## FGE 1023 COMMUNICATION SKILLS II

## Part 2 (ii)

Fill in the blank with the suitable explanation about introduction, main body and conclusion as given in the table (10 marks)

Introduction (2 marks)	
Main body (6 marks)	
Conclusion (2 marks)
